

Redesign the Misleading Colored Chart

R.No: 25 Reg. No: 192473018 Name: N LAHARI

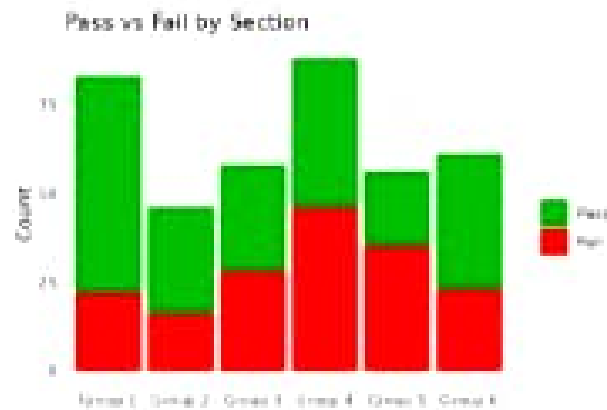

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

1. What is this chart trying to show?
2. What's wrong with the color choice?
3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?
2. What's wrong with the color choice?
3. Propose a better color scheme (describe it in words):

Chart-1:

- 1) This chart is trying to show the attendance of students in Groups A, B, C, D and E.
- 2) The colors are confusing because they use a red-to-blue which can make the groups look as if they represent different categories.
- 3) Use one consistent color for all bars, such as blue, with the same shade for every group. The bar height should show the attendance difference.

Chart-2:

- 1) It compares the number of students who passed and failed in each group. It shows the pass to fail numbers for groups 1 to 6.
- 2) Red & green can be difficult for people with color-vision deficiencies to distinguish, and the colors may also suggest a judgment rather than simply showing two categories.
- 3) Use blue for pass & orange for fail with clearly contrasting shades. Adding labels or labels or patterns would make categories even easier to distinguish.
